
LETTER TO THE BOARD

To the Beartooth Electric Cooperative Board of Trustees

February 25, 2013

Dear BEC board members,

I just wanted to let you all know how impressive you are, both collectively as a board and as individual members. Under extremely difficult circumstances, you have totally changed the way the board operates and its relationship with its members. In addition, you have forged ahead in a number of areas (communications, policies, by-laws) while dealing with the Southern debacle AND identifying possible alternative avenues for BEC.

In doing all of the above, you have identified and worked with many very qualified members who have willingly offered their help. You have not felt threatened by other's expertise, but have benefitted by it. This speaks highly of your professionalism and competence as a board.

Members who did not attend meetings prior to the board change-over may not realize how much you have accomplished in a short time. But those who have paid attention know—and appreciate—your dedication.

Just saying "thank you" for all your work does not seem nearly enough; it is a mere reflection of the depth of our gratitude.

Thanks to our very own miracle-workers!

Kathleen Ralph
